30 April 1953

25X1A	er division notics
25X1A	SUBJECT: Retroactive Approvals and Authorisations
	REFERENCE: Dated 10 April 1953, "Clandestine Services Travel Procedures"

- 1. The reference notice carried an amendment to travel procedures issued 20 February 1953. Your attention is directed to Faragraph 3. b (2) (b). "Retroactive approval of travel performed at personal expense will be granted only when it can be demonstrated that an unanticipated situation of extreme urgency prevented the obtaining of prior authorization." Your attention is also directed to Faragraph 3. e (1) (c) having to do with temporary duty travel in which the last sentence states "This emergency authorization will be the personal responsibility of the Area Division Chief."
- 2. Retroactive authorization of travel is rarely justified. As in the exercise of most special authority, it is usually a reflection of bad planning and poor staff work. With the increasing emphasis being placed by the Director upon the proper and adequate expenditure and control of unvouchered funds, it is even more important that everyone avoid the need for resorting to such irregular practices.
- 3. Although the reference notice is addressed only to the problem of travel, the same issue is involved in retroactive approval of salary commitments to agents, delayed accountings for advances, and commitments or expenditures by persons not authorized to make such commitments or expenditures. The Administrative Staff of SR Division is prepared and willing to give every assistance and expeditions treatment to any travel or financial problem of the operating branches. In most instances a prompt call upon this Staff for assistance will obviate the need for later laborious or detailed explanation or justification.

22 May 1953

SR	DIVISION	NOTICE
23.63	DIVERSAUM	Take To the Con-

SUBJECT: Supervision of Projects and Accountability

- 1. Reference is made to the memorandum dated 15 April 1953 from the Director to the Deputy Director (Plans) on the subject: "Supervision of Projects and Accountability." A copy of the subject memorandum was circulated through SR Division during the first week in May and called attention to the fact that responsibility for approval of expenditures should not stop with the Director's signature on a PRC recommendation and also that the responsibility did not reside with the individual case officer.
- 2. The signature of an approving officer on a voucher is presumed to be evidence of his determination that the action involved is legal and proper. Many such vouchers are by their very nature either self-supporting or supported by documentation in the form of ticket stubs, receipts, and so forth, or by existing contracts providing for a fixed pattern of payments. There are, however, a large number of such vouchers which are totally unsupported by anything more than the signature of a case officer. These include supported by anything more than the signature of a case officer. These include such things as cash payments for purchase of confidential information, reimbursement for travel of agent personnel unsupported by travel orders or contract stipulations, entertainment of agents or prospective agents, and so forth.
- 3. In order that I may properly discharge my responsibility in approving such documents, it is requested that henceforth all such vouchers submitted by case officers be concurred in by the branch or staff chief concerned. Such concurrence shall be evidenced by a statement over the signature of the branch or staff chief to the effect that the action was necessary and appropriate to the operation concerned and that documentary support is one file in the branch or staff concerned. This will be notification to the approving officer that the determination has been made that the meeting, entertainment, information purchase, or whatever, was a proper operational incident and was done at the direction of or with the subsequent approval of the branch or staff chief. In the absence of such determination, it would reasonably be incumbent upon the approving officer to determine that the action was a proper one. Such an intrusion of administration into operational questions would violate the fundamental relationship which has long existed between operations and administration. I am sure that such an intrusion would be unacceptable to the operator concerned and certainly it is not desired by me.
